

Globe Light 5w - Rechargeable Emergency

A60 Globe Light 5w Rechargeable Emergency Cool White

Product Codes	B22gs-5w25cwE
	E27gs-5w25cwE
Power (watts)	5
Operating voltage	200-250v
Lamp cap	E27 / B22
Expected Life (DS)	1000 Duty Cycles
Light output (lumens)	~300 (cw)
Colour temperature	6000k Cool White
Colour rendering index	70
Beam angle (degrees)	180°
Dimming range	Non-dimmable
Replaces : Incandescent	40w
Replaces : Halogen	N/A
Replaces : CFL	10w
Dimensions (l x b x h) wt	110 x 60 x 60mm (74g)

This value for money LED A60 Globe Light that replaces a 200-250v incandecent or CFL A60 Globe and which uses up to 8 times less electricity than it's retrofit alternative, comes with a 1 year warranty.

This Cool White closely replicates a 10w CFL A60 Globe with the additional advantage of automatically switching on using its internal power supply during power failure or load shedding.

This bulb uses 25 SMD 2835 Sanan LED chips and a translucent lens to give a very even light spread throughout it's 180° beam angle while being operated on either grid or self power.

The life expectancy of this globe is 1000 duty cycles (full recharge and discharge) and has an expected LED light life of 30000 hrs and is RoHS compliant.

The battery life of the globe from full charge is over 5 hours, the first 2 will be at full light output and then slowly dimming automatically for the remainder, to extend light duration.

This bulb should not be used in conjunction with OLD incandescent globes or dimmers as this adversely effects the normal operation and longevity.

The battery charges when the light is switched on at the wall socket on a 220v/240v supply.

This globe can also be used as a torch by bridging the contacts with your finger or other part of you body

This bulb is not currently available in a dimmable or warm white version but these may be available shortly.
